

HR & Payroll

Executive Summary

HR & Payroll is the people hub of Operations. It brings together everything an organisation needs to manage its workforce in one place — employee records, team structure, hiring and leaving processes, payroll runs, performance scorecards, internal communications, and work schedules.

Instead of maintaining separate spreadsheets for staff lists, email chains for onboarding checklists, and disconnected payroll files, HR & Payroll provides structured workflows with clear ownership. HR administrators manage the full employee lifecycle; line managers track performance and complete review cycles; payroll officers process pay periods and distribute payslips; and employees (where permitted) view their own performance and download payslips.

The HR Dashboard gives leadership a workforce snapshot: headcount, grade distribution, performance trends, active onboarding and offboarding pipelines, upcoming birthdays, recent announcements, and optional AI-generated HR analysis summarising workforce health.

HR connects naturally to Organisation settings for roles and permissions, to School and Clinic modules through user groups (streams, classrooms, departments), and to the core user account system that controls who can sign in to Operations.

Who This Is For

Role	How they use HR & Payroll
HR managers	Employee records, onboarding/offboarding, announcements, workforce reporting
Payroll officers	Pay periods, payroll processing, payslip distribution
Line managers	Performance reviews, metric tracking, team group management
Department heads	User groups, timetables, shift planning
Employees	Own performance dashboard, payslip download (where permitted)
System administrators	User creation, invitations, role assignment (via Organisation → Roles)

Key Capabilities

- HR dashboard with workforce KPIs, charts, and AI analysis
 - Employee directory with inline editing, import, and invitations
 - User groups and group types (teams, streams, classrooms, business units)
 - Payroll processing with bonuses, deductions, overtime, and payslip email
 - Pay period management
 - Onboarding and offboarding with checklist templates
 - Performance management — scorecards, metric tracking, reviews, grading scales
 - Metric overseers (subject/classroom assignment for scoring)
 - Announcements with rich content, attachments, and bulk email
 - Timetables — individual entries and group shift creation
 - Role management (via Organisation → Roles, linked from Users menu)
-

Important Concepts

Term	Meaning
User / Employee	A person in your organisation. May or may not have system login access.
User group	A team, department, stream, or classroom grouping people for permissions, scheduling, and reporting.
Group type	The category of group — Business Unit, Team, Stream, Classroom, etc.
Pay period	A defined date range (for example 1st–30th) for which payroll is calculated.
Payroll record	One employee's pay for one period — base salary, bonuses, deductions, net pay.
Onboarding template	A reusable checklist of tasks (HR, IT, Manager, Finance) for new starters.
Offboarding template	A reusable exit checklist (asset return, access removal, handover).
Scorecard	A performance framework with dimensions and metrics assigned to employees.
Metric tracking	Regular entry of measured values that feed performance scores.
Announcement	An internal document — newsletter, policy, notice — published to staff.

Table of Contents

16. [Recommended HR Workflows](#)
17. [Troubleshooting Common Situations](#)

Getting Started

1. Open **HR & Payroll** in the sidebar.
2. Review the **Dashboard** for your workforce snapshot.
3. Confirm **Pay Periods** exist before running your first payroll.
4. Ensure **Roles** are configured under Organisation before inviting users.

![[Screenshot: HR sidebar navigation — placeholder]]

HR Dashboard

Open **HR & Payroll** → **Dashboard**.

What you see

Quick navigation to Employees, Groups, Performance, Onboarding, Offboarding, Payroll, Announcements, and Timetables.

KPI cards typically include:

- Total headcount (active employees)
- Average or aggregate performance score
- Active onboarding processes in progress
- Recent announcements count

Charts and tables:

- Grade or level distribution
- Performance trend over time
- Onboarding pipeline — who is mid-checklist
- Offboarding pipeline — pending exit tasks
- Recent hires
- Upcoming birthdays
- Workforce demographics breakdown
- Recent newsletters and policies

AI HR Analysis (where enabled) — an optional sidebar summarising workforce status, flagging bottlenecks in onboarding, and highlighting performance trends.

Quick action: Add Employee from the dashboard banner.

Managing Users and Employees

Go to HR & Payroll → Users.

Users list

A searchable, sortable table of all employees showing:

- Name, email, username, phone (editable inline)
- Assigned role
- Account status — **Active** or **Pending** (invited but not yet accepted)

Search by name or email. **Filter by group** to see one team only.

Inline editing

Click directly in name, email, username, or phone cells to edit. Changes save on confirmation — useful for quick corrections without opening the full profile.

Bulk actions

Select multiple rows, then:

Action	Purpose
Activate	Enable accounts
Assign role	Set role for all selected
Add to group	Place in a user group
Revoke permissions	Remove access
Archive	Deactivate leavers
Generate QR codes	Create QR codes for employee IDs or badges

More menu

From **More**:

- **Manage Roles** → Organisation role management
- **User Subjects** → Metric overseers setup
- **Invite Users** → send email invitations
- **Import Users** → bulk file import
- **User Groups** → group management

Per-row actions

- Change role from dropdown
 - **View / Edit** — full profile
 - **Reset password**
 - **Upload scorecard** — attach performance document
 - **Delete** — remove record (use with caution)
-

Creating and editing an employee profile

Navigate to **HR & Payroll** → **Users** → **Add User** or open an existing user.

![Screenshot: Full employee profile form — placeholder]

Core details

Field	Notes
First name / Last name	Required
Email	Required for invitations and payslips
Phone	Optional SMS verification available
Username	Sign-in identifier
Address	Full postal address
Department	Links to organisational structure
Job title	Displayed on profile and reports
Gender	Optional demographic field
Date of birth	Used for birthday alerts on dashboard
Hire date	Employment start

Custom fields

Your organisation may define additional custom fields — complete these per your internal HR policy.

Group leadership

On edit, assign the employee as **leader** of:

- Streams
- Classrooms
- Teams

Leaders appear on group records and may receive additional permissions.

Saving

Save the profile. If the person needs system access, proceed to **Invite Users** or assign a role directly.

Importing and Inviting Users

Import users

Go to **HR & Payroll** → **Users** → **Import Users** (via More menu).

![[Screenshot: Import users screen — placeholder]]

File import mode:

1. Download the CSV/Excel **template**.
2. Fill in rows — first name, last name, email (required), phone, job title, address, department.
3. Upload the file.
4. **Map columns** if headers differ from the template.
5. Preview imported rows.
6. Confirm import.

Manual entry mode:

Enter rows directly in a spreadsheet-style grid without uploading a file.

Invite users

Go to **HR & Payroll** → **Users** → **Invite Users**.

![[Screenshot: Invite users screen — placeholder]]

1. Enter email addresses — one per line.
2. Click **Send Invites**.
3. Track invitation history — status shows Pending, Accepted, or Expired.
4. **Resend** or **Revoke** pending invitations.
5. **Copy join link** for manual sharing.

Invited users receive an email with a link to set their password and activate their account.

User Groups and Teams

Go to **HR & Payroll** → **User Groups**.

![[Screenshot: User group types list — placeholder]]

Group types

The first screen lists **group types** — the kinds of groups your organisation uses:

- Business Unit
- Team
- Stream (common in schools)
- Classroom
- Custom types you define

Actions:

- **New Group Type** — create a type with display name and system identifier
- **View Groups** — drill into groups of that type
- **Delete Type** — remove unused types

Groups within a type

Click a type to see all groups of that kind.

![Screenshot: Groups within a type — placeholder]

Column	Content
Name	Group name
Type	Group type
Leader	Assigned leader
Members	Member count

Create a single group, or **Paste** multiple names (one per line) for bulk creation.

Editing a group

Open a group to manage:

- **Name and type**
- **Parent group** — for hierarchical structures (department → team)
- **Leader** — dropdown of users
- **Members table** — add or remove users via offcanvas picker

![Screenshot: Edit group with members — placeholder]

Groups filter the Users list, scope announcements, drive group shift timetables, and link to Clinic departments and School streams.

Payroll

Go to HR & Payroll → Payroll.

Orbit Private Limited Home / Hr / Payroll Refresh Maximise Help Analyst MUFANDIRI FELIX

Search menu (Ctrl+K)

Payroll List
Manage employee payroll records and pay periods.

+ Add Payroll Pay Periods Download

-- Select Pay Period -- Send Slips Select period to email slips to employees.

ID	Employee	Pay Period	Base Salary	Bonuses	Deductions	Net Pay	Payment Date	Actions
7	Memory Zvinavashe	December 2025	\$100.00	\$0.00	\$0.00			...

Pindah Basa © 2026 - All rights reserved Help admin@pindah.org 1.0.0

Payroll list

Shows all payroll records with:

- Employee name
- Pay period
- Base salary
- Bonuses total
- Deductions total
- Net pay
- Payment date

Pay period selector at the top — filter to one period for review and bulk email.

Actions

Action	Purpose
Add Payroll	Create a new payroll record
Pay Periods	Manage period definitions
Download	Export Excel or PDF
Send Slips	Email PDF payslips to all employees in selected period
Per record: View PDF	Preview individual payslip
Per record: Download	Save PDF locally
Per record: Duplicate	Copy to next period as starting point

Employees with appropriate permissions can view and download **their own payslip** without full payroll admin access.

Adding a payroll record

Go to **HR & Payroll** → **Payroll** → **Add Payroll**.

![[Screenshot: Add payroll form — placeholder]]

1. Select **Employee**.
2. Select **Pay Period**.
3. Enter **Base salary**.
4. Add **Bonuses** — type and amount (multiple lines).
5. Add **Deductions** — name and amount (multiple lines).
6. Enter **Overtime hours** and **overtime rate** if applicable.
7. Set **Payment date**.
8. Review calculated **Net pay**.
9. Submit.

Pay Periods

Go to **HR & Payroll** → **Payroll** → **Pay Periods**.

![[Screenshot: Pay periods list — placeholder]]

Pay periods define the date ranges for payroll. Each row shows start date, end date, creator, and organisation.

To add a period:

1. Click add/new row.
2. Enter **start date** and **end date**.
3. Save.

Edit dates inline on unused periods. Periods already referenced by payroll records **cannot be deleted** — create a new period instead.

Establish at least one pay period before creating payroll records.

Onboarding

Go to HR & Payroll → Onboarding.

![Screenshot: Onboarding main screen — placeholder]

Two tabs: **Employees** (active processes) and **Templates** (checklist definitions).

Creating an onboarding template

1. Open the **Templates** tab.
2. Click **Create Template**.
3. Enter **Name** and **Description**.
4. Add **Tasks** — each with title and category:
 - HR (contract, policies)
 - IT (laptop, email, access)
 - Manager (introduction, workspace)
 - Finance (bank details, payroll setup)
5. Save the template.

![Screenshot: Onboarding template editor — placeholder]

Starting onboarding for new hires

1. Open the **Employees** tab.
2. Click **New Onboarding**.
3. Select a **Template**.
4. Select one or more **Employees** to onboard.
5. Start the process — a checklist instance is created per employee.

Working through the checklist

1. Open an employee's onboarding process.
2. A side panel shows all tasks with progress percentage.

3. Mark each task **Complete** as it is done.
4. Reopen tasks if needed.
5. Process reaches 100% when all tasks are complete.

![Screenshot: Onboarding checklist in progress — placeholder]

Offboarding

Go to **HR & Payroll** → **Offboarding**.

![Screenshot: Offboarding main screen — placeholder]

Mirrors onboarding with **Employees** and **Templates** tabs — but for leavers.

Exit templates

Create templates with checklist items tagged by department:

- HR — exit interview, final pay
- IT — revoke access, collect equipment
- Manager — handover documentation
- Finance — final expense claims

Initiating offboarding

1. Click **Initiate Offboarding**.
2. Select employees leaving the organisation.
3. Choose an exit template.
4. Work through the checklist until all items are complete.

![Screenshot: Offboarding checklist — placeholder]

Always run offboarding **before** archiving the user account to ensure access is properly revoked.

Performance Management

Go to **HR & Payroll** → **Performance**.

The performance area has four sub-sections accessible via tabs: **Dashboard**, **Tracking**, **Reviews**, and **Setup**.

![Screenshot: Performance management shell — placeholder]

Performance Dashboard (personal view)

Shows the logged-in user's scorecard:

- Overall performance score
- Goal attainment percentage
- Peer ranking (where configured)
- Period progress bar
- Insights and recommendations
- Trend charts
- Dimension scores
- Individual metric cards

Performance Coach — optional AI chat offcanvas for guidance on improving scores.

Setup

Go to **Performance** → **Setup** (or click Setup from the banner).

Configure the performance framework:

Section	Purpose
Templates	Pre-built scorecard templates to start from
Scorecards	Define dimensions and structure
Metrics Library	Reusable metrics (KPIs)
Grading Scales	Map scores to ratings (Excellent, Good, etc.)

AI import — upload strategy documents or existing scorecard files to auto-generate structure.

![Screenshot: Scorecard setup — placeholder]

Typical setup workflow:

1. Choose or import a template.
2. Define dimensions (for example Sales, Quality, Teamwork).
3. Add metrics to each dimension with targets and weightings.
4. Create grading scales.
5. Assign scorecards to employees (via user profile upload or assignment screen).

Tracking (metric entry)

Go to **Performance** → **Tracking**.

![Screenshot: Metric entry grid — placeholder]

A grid grouped by dimension. For each metric:

1. Enter **Value**.
2. Set **Date/time** (or use shared date for bulk entry).
3. Add optional **Comment**.
4. Click **Save All** to submit.

Tracking data feeds the review scores visible to managers.

Reviews (manager view)

Go to **Performance** → **Reviews** (route: `/hr/performance/users`).

![Screenshot: Manager performance reviews list — placeholder]

Managers see all employees with:

- Overall score
- Rating label
- Goal attainment percentage

Filter by role. **Search** by name, email, or job title.

Expand a row to see dimension scores and metric highlights.

Open drawer for full individual detail.

Consolidate Metrics — roll up tracking entries into review scores for the period.

Metric Overseers

Go to **HR & Payroll** → **Scoring Metric Oversees** (also linked as **User Subjects** from **Users** → **More menu**).

![[Screenshot: Metric overseers — placeholder]]

Assign users to **monitor metrics** by subject and classroom — common in school environments where a head of department oversees scores for their subject area.

Export assignments to Excel for external reporting.

Announcements

Go to **HR & Payroll** → **Announcements**.

![[Screenshot: Announcements categories — placeholder]]

Structure

Announcements are organised in **categories** (for example Newsletters, Policies, General Notices). Each category contains **documents** with title, rich-text content, optional file attachment, and date.

Creating an announcement

1. Select a category (or create one).
2. Click **Add**.
3. Enter **Title**.
4. Write **Content** in the rich-text editor, or attach a **File**.
5. Save and publish.

![[Screenshot: Announcement editor — placeholder]]

Bulk email

Select one or more documents, then **Bulk Email**:

1. Choose announcement types and documents to include.
2. Select recipient **user groups** and/or individual users.
3. Write **Subject** and **Body** for the email.
4. Send — recipients receive the announcement by email.

Managing documents

- **Edit** — update content
- **Remove** — moves to Documents trash (recoverable)

- **Subfolders** — organise within a category

Active announcements may appear on the HR dashboard.

Timetables and Shifts

Go to **HR & Payroll** → **Timetables**.

![[Screenshot: Timetables list/calendar — placeholder]]

Individual timetable entries

List or calendar view of scheduled entries.

Filters: search, type (Shift / Duty / Class), branch, assigned user, date range.

Add Entry:

Field	Content
Type	Shift, Duty, or Class
Location / Branch	Where
Assigned user	Who
Start / End dates	When
Subject	What (for classes)
Status	Planned, Confirmed, etc.
Priority	Optional ranking

![[Screenshot: Add timetable entry — placeholder]]

Group shifts

Go to **HR & Payroll** → **Timetables** → **Group Shifts** (or **Create Group Shift** from timetables).

![[Screenshot: Group shift creation — placeholder]]

Create one shift definition and apply it to **every member** of a selected user group simultaneously:

1. Select **Group**.
2. Set shift details — subject, start/end, status, priority, location.
3. Save — individual entries are created for each group member.

Ideal for ward rosters, classroom schedules, and team duty rotas.

Roles and Permissions

Role management is accessed from **HR → Users → Manage Roles** or **Organisation → Roles**.

![[Screenshot: Role management — placeholder]]

Roles tab (`/organisation/roles/roles`)

- View all roles
- **Create** a new role
- **Duplicate** an existing role as a starting point
- Toggle **permissions** by module — view, create, update, delete
- **Rename** or **Delete** roles

Search and filter the permission matrix when configuring complex roles.

User roles tab (`/organisation/roles/user-roles`)

- Select a **User**
- Assign their **Role**
- Set **Permission overrides** — grant or revoke individual permissions beyond the role
- Set **Validity dates** on temporary permission grants

Always assign the principle of least privilege — give staff only the access their job requires.

How HR Connects to Other Modules

Module	Connection
Organisation	Roles, permissions, security settings, billing
School (Frame)	User groups as streams and classrooms; metric overseers by subject; timetables for classes
Clinic	User groups as departments; doctor schedules reference staff users
Accounting	Payroll amounts may align with financial expense recording (process-dependent)
Core platform	Every employee with login access is a user; invitations flow through authentication

Recommended HR Workflows

Hiring a new employee (end to end)

1. **Create user profile** in HR → Users (or import/invite).
2. **Assign role** and add to **user groups**.
3. **Send invitation** email.
4. **Start onboarding** with appropriate template.
5. Work through checklist — IT creates access, manager assigns workspace, HR completes contract tasks.
6. Add to **payroll** when ready — ensure pay period and salary are set.
7. Assign **scorecard** in Performance if applicable.

Monthly payroll cycle

1. Confirm **pay period** dates are correct.
2. Review any salary changes from HR records.
3. **Add payroll** records (or duplicate from previous period and adjust).
4. Review net pay totals.
5. **Send slips** by email to all employees in the period.
6. **Download** Excel/PDF for finance records.

Performance review cycle

1. **Setup** — confirm scorecards and metrics for the review period.
2. **Tracking** — employees and managers enter metric values throughout the period.
3. **Consolidate Metrics** before review meetings.
4. **Reviews** — managers review scores, expand rows, discuss in meetings.
5. Record outcomes and plan next period targets.

Employee leaving

1. **Initiate offboarding** with exit template.
2. Complete all checklist items — especially IT access revocation.
3. Process **final payroll**.
4. **Archive** user account.
5. Remove from active user groups.

Troubleshooting Common Situations

Situation	What to do
Invited user did not receive email	Check spam; resend invite; verify email address on profile
Cannot delete pay period	Period is in use by payroll records — create new period instead
Employee cannot download payslip	Confirm payroll record exists for period; check employee self-service permission
Onboarding stuck below 100%	Open checklist; verify all tasks marked complete; reopen and re-close if needed
Performance score shows zero	Confirm metrics entered in Tracking; run Consolidate Metrics
User cannot access a module	Check role permissions in Organisation → Roles; refresh permissions from profile menu
Group shift created wrong entries	Delete incorrect entries; recreate group shift with corrected dates
Announcement email not received	Verify recipient group membership; check bulk email selections

![[Screenshot: HR help and support — placeholder]]
