

Inventory & Stock Management

Complete user guide for Pindah Basa

Warehouse staff. Store managers. Inventory controllers. Procurement. Finance.

Know what you have, where it is, and how it moved — catalogue, receipts, transfers, stock takes, pricing, and reports in one connected module of **Pindah Basa**.

Product	Pindah Basa — Inventory & Stock Module
Publisher	Pindah Private Limited
Website	www.pindah.org
Platform	basa.pindah.org
Contact	admin@pindah.org · +263 714 856 897

Pindah Private Limited builds **Pindah Basa**, the operating platform for organisations that have outgrown fragmented systems. Stock, accounting, pharmacy, and procurement share one data layer — multi-location quantities, FEFO batches where used, and valuation that feeds the general ledger.

Learn more at pindah.org

When your operations outgrow the systems that built them.

Executive Summary

Inventory & Stock answers three questions at all times: **what do we have, where is it**, and **how did it move**.

From this module you manage the product catalogue, categories, warehouses and stores, suppliers, purchase receipts (goods receiving), transfers between branches, physical stock takes, markup rules and price approvals, POS tills, packages, and movement reports. Every sale in Accounting, every pharmacy dispense, and every stock receipt that posts to GL flows through these records.

The **Stock Dashboard** shows carrying value (IAS 2), stock health, receipts vs issues, reorder proposals, and NRV / dead-stock candidates — filterable by location.

Who This Is For

Role	How they use Stock
Warehouse staff	Receive goods, pick transfers, stock takes
Store managers	Monitor levels, approve prices, review reports
Inventory controllers	Catalogue, reorder levels, audit movements
Procurement	Suppliers, stock receipts / orders
Cashiers	Tills linked to locations (sales in Accounting POS)
Finance	Valuation, movement reports, costs feeding GL

Key Capabilities

- Stock dashboard with KPIs, health, reorder and NRV insights
 - Full product catalogue with bulk add, barcodes, categories
 - Categories (hierarchical), suppliers, locations, units, pack sizes
 - Stock receipts / purchase orders (Draft → Pending → Partial → Received)
 - Stock takes with progress, variances, In Progress / Completed / Cancelled
 - Stock transfers (Request → approval → in transit → received / completed)
 - Issue/Transfer for internal issues (via Accounting POS transfer mode)
 - Markup rules (Global, Category, Supplier, Product priority)
 - Price change approvals queue
 - Product packages (bundles for quick sales)
 - Till management per location
 - Reports: item movements, purchases, sales, issues, summary by item / customer
-

Important Concepts

Term	Meaning
Product	Item you buy, stock, and sell — name, code, category, costs, sell price, reorder level
Location	Warehouse, store, or stock point; quantities are per location

Term	Meaning
Till	POS terminal tied to a location (e.g. L-10141)
Stock receipt / Order	Supplier receipt progressing Draft → Pending → Partial → Received
Markup rule	Formula for sell price from cost; priority Product → Supplier → Category → Global
Price change request	Proposed price awaiting manager approval
Stock take	Physical count vs system quantities; variance report
Stock transfer	Controlled move between locations
Package	Bundle of products sold together at POS
FEFO / batch	Earliest-expiry-first (pharmacy / perishables)
Carrying value	Inventory valuation (IAS 2) on the dashboard

Menu Map (sidebar)

Open **Stock** in the left sidebar of **Pindah Basa**.

- 17. [How Stock Connects to Other Modules](#)
- 18. [Setup Guide for New Organisations](#)
- 19. [Daily and Monthly Routines](#)
- 20. [Troubleshooting](#)

Getting Started

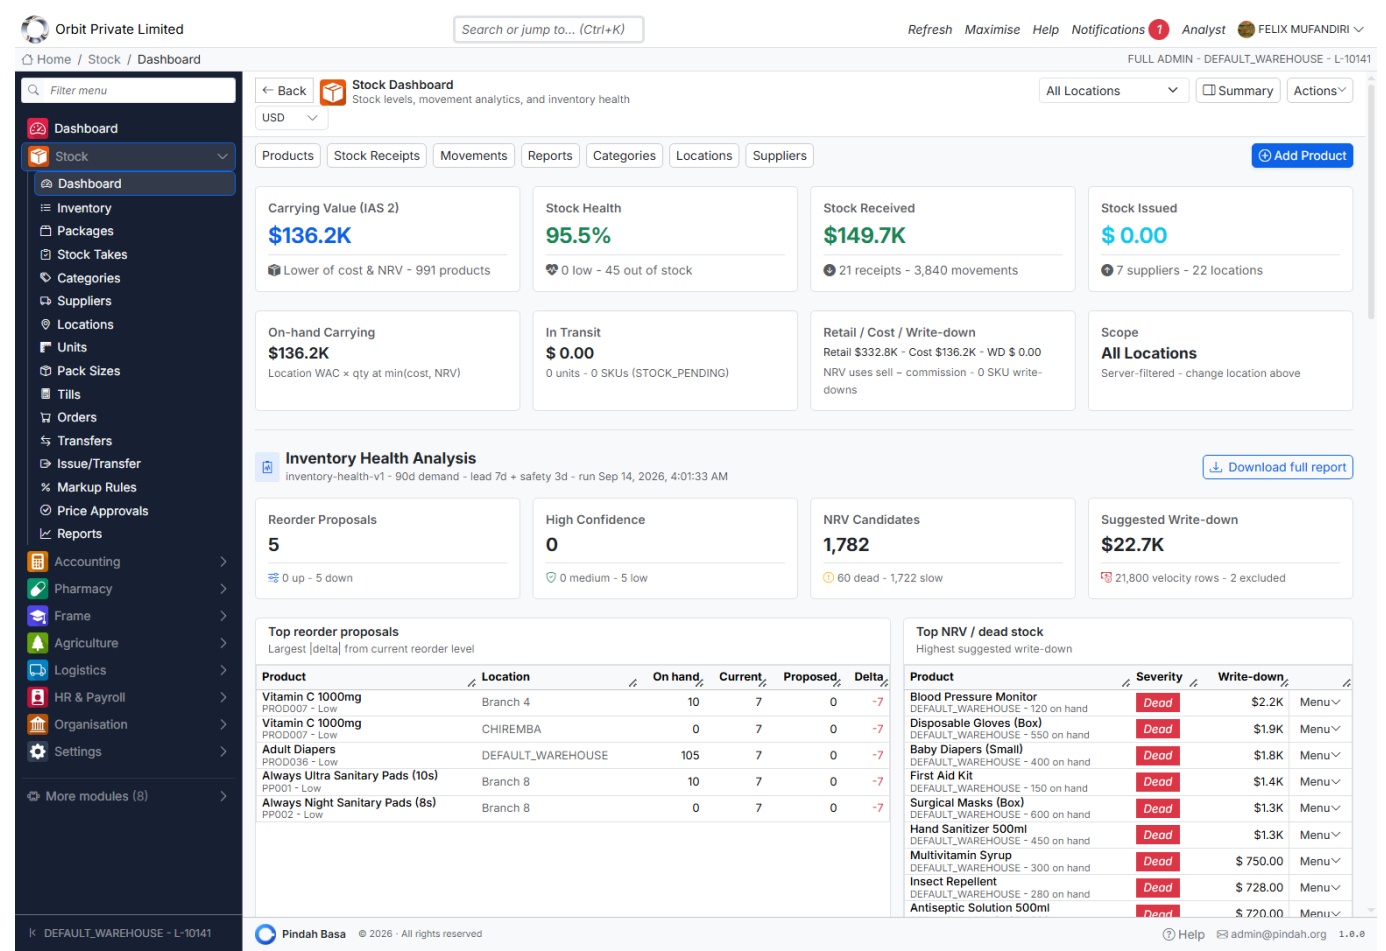

- 1. Sign in to basa.pindah.org.
- 2. Confirm **location** / **till** in the top bar.
- 3. Open **Stock** in the sidebar → **Dashboard**.
- 4. For first-time setup, follow [Setup Guide for New Organisations](#).

Tip: **Ctrl+K** jumps to any Stock screen by name.

Stock Dashboard

Path: Stock → Dashboard

URL: </stock/dashboard>

What you see

Metric	Meaning
Carrying Value (IAS 2)	Inventory valuation and product count
Stock Health	% healthy; out-of-stock count
Stock Received	Value / receipts / movements in period
Stock Issued	Issues / suppliers / locations context
On-hand / In transit / Retail vs cost	Position and retail comparison
Inventory Health Analysis	Reorder proposals, NRV / dead stock, suggested write-down

Controls

Control	Purpose
Location filter	Scope to one branch or All Locations
Summary	Condensed view
Actions	Add Product, Receive Stock, Transfer Stock, View Products, Reports, Download Health Report
Tabs	Products, Stock Receipts, Movements, Reports, Categories, Locations, Suppliers

Tables at the bottom highlight **Top reorder proposals** and **Top NRV / dead stock** with row menus.

List

Shows name, code (**PROD...**), category, Standard Cost, L.P.C. (last purchase cost), Sell \$, Stock (green / red for zero), Min (reorder), Menu.

Filter by search, category, and warehouse. Paginate large catalogues.

Header actions

Action	Purpose
+ Add New Product	Single product form (<code>/stock/add</code>)
Bulk Add Products	Spreadsheet-style multi-add (<code>/stock/inventory/new</code>)
Actions	Download, barcodes, email summary, bulk category, delete selected

Typical row / product actions

Edit; create sale; issue; receive stock; stock take; generate barcodes — exact menu depends on permissions.

Adding a product

- 1. + **Add New Product.**
- 2. Enter **Name, Code, Category, Supplier, Cost, Sell price, Reorder / Min, Unit**, optional barcode.
- 3. Set opening quantity per location if needed.
- 4. Save.

Bulk add

- 1. **Bulk Add Products.**
- 2. Use template / paste rows.
- 3. Validate and save.

DEFAULT_WAREHOUSE - L-10141

Pindah Basa © 2026 · All rights reserved

Helpadmin@pindah.org1.0.0

Warehouses, stores, and branches.

Column	Notes
Name	e.g. DEFAULT_WAREHOUSE, Branch 4
Code	Short code (e.g. C01)
Address	Optional
Default	One location marked default

Add a new location on the empty bottom row. Every quantity and till is tied to a location.

Units and Pack Sizes

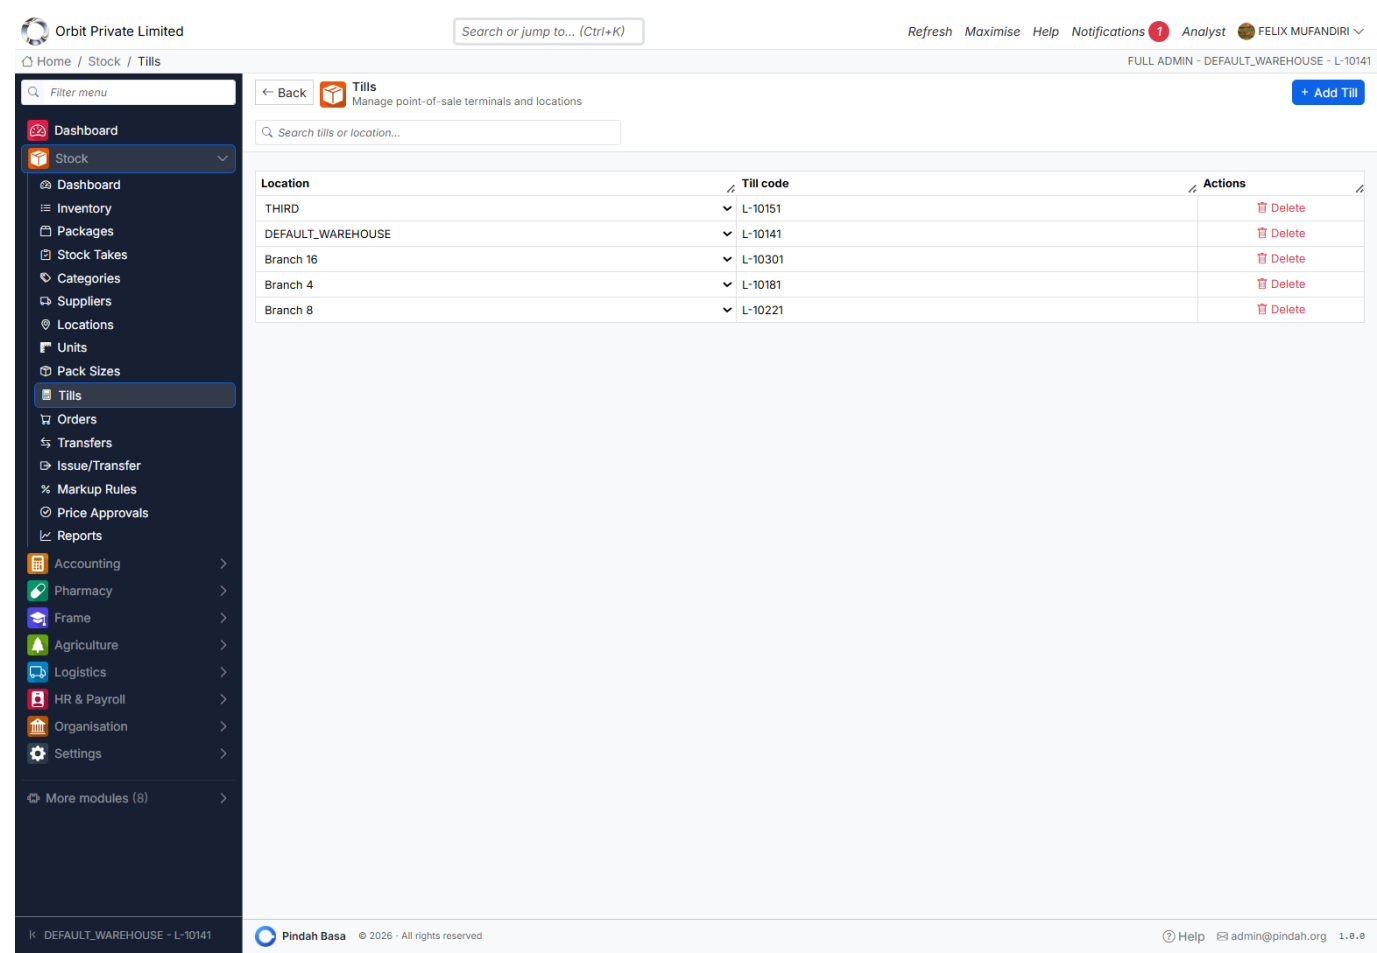

Units (/stock/units) — units of measure (each, box, litre, ...) assigned on products.

Pack Sizes (/stock/pack-sizes) — pack definitions for purchasing and selling in multiples.

Maintain these before bulk-loading products so codes stay consistent.

Tills

Path: Stock → Tills

POS terminals linked to locations.

Column	Example
Location	DEFAULT_WAREHOUSE
Till code	L-10141
Actions	Delete

+ **Add Till** creates a terminal for a location. Accounting POS and stock issues require a till to load products and deduct stock correctly.

Title: **Stock Receipts** — purchase orders and receiving history.

Status tabs

All Orders | Draft | Pending | Partial | Received | Canceled

Actions

Button	Purpose
+ New Order	Create purchase / receipt draft
Receive Stock	Open receiving flow (/stock/orders/receive)
Actions	Extra tools / exports

Columns

#, Date, Supplier, Location, Invoice #, Items, Total Value, Status, Created By, Menu.

Receiving workflow

1. **Receive Stock** or open a Pending order → **Fulfill**.

2. Confirm location, supplier, invoice number, lines, batch/expiry if used.

3. Complete receive — stock increases; Accounting may post **GOODS_RECEIVED** when costing is present.

Statuses: **Draft** → **Pending** → **Partial** → **Received** (or **Canceled**).

1.0.0

Move stock between locations with a controlled lifecycle.

Status tabs

Request | Awaiting approval | In transit | Dispatched | Received | Completed (plus Rejected on rows)

Actions

Button	Purpose
+ New transfer	Create request (/stock/transfers/create)
Bulk transfer	Multi-line / multi-item transfer (/stock/transfers/bulk)

Typical flow

Request → Awaiting approval → In transit / Dispatched → Received → Completed
↘ Rejected

1. Create transfer: From location/till → To location, add items.
2. Approver accepts or rejects.

- 3. Dispatch / mark in transit.
- 4. Destination **Receives** — quantities move; GL may post transfer events.

Filter by status, location, and date range. Search by transfer id.

Issue / Transfer

Path: Stock → Issue/Transfer
URL: /accounting/sales/create/transfer

Opens the Accounting **Issue/Transfer** (POS transfer mode) for internal stock issues without a customer sale — creates a transfer / issue request that completes through Stock transfers and stock deduction at the till's location.

Use for: branch replenishment, internal consumption, warehouse-to-store moves when using the POS-style picker.

Physical counts and reconciliation.

List

Filter **All Statuses** / **All Locations**. + **New Stock Take**.

Column	Meaning
#	Stock take id
Location	Branch or All Locations
Category	Scope of count
Status	In Progress / Completed / Cancelled
Progress	Variance count / progress bar
Started / Created By	Audit

Counting

- 1. + **New Stock Take** — choose location (and category if offered).
- 2. Open count screen (`/stock/stocktakes/:id/count`).
- 3. Enter counted quantities (blind count / scan where enabled).
- 4. Review **variances**.
- 5. Complete — system adjusts stock; Cancel abandons without applying.

Automatic sell-price calculation from cost.

Priority (most specific wins)

Product → Supplier → Category → Global

Screen

- Search / filter by type and Active
- Stats: Active Rules, Avg Markup, Range
- Cards show type badge (Category, Global), %, price range, **Apply**, Edit, Delete
- + **Create Rule**

After creating or changing a rule, use **Apply** so products recalculate. Resulting price changes may enter the **Price Approvals** queue.

Search item, reference, batch...

DateItemLocationTypeQuantityUnit CostBalance AfterReferenceDest.Creator

No stock movements found matching your filters.

Tabs:

Report	Purpose
Item Movements	All stock movements (default)
Purchases	Purchasing / receipt analytics

Report	Purpose
Sales	Sales by item
Issues	Issue summary
Summary by Item	Aggregated by product
Summary by Customer	Aggregated by customer

Set Start / End dates, search item / reference / batch, then **View** or **Download**.

Movement columns typically: Date, Item, Location, Type, Quantity, Unit Cost, Balance After, Reference, Dest., Creator.

How Stock Connects to Other Modules

Module	Connection
Accounting POS / Invoices	Sales reduce stock; COGS posts to GL
Accounting Purchase Orders	Commitment; physical receive is Stock Orders
Procurement	Supplier invoices / payments after goods received
Pharmacy	Dispense draws product stock (FEFO)
Organisation	Roles gate Stock screens

Receipts with cost feed inventory valuation and optional **GOODS_RECEIVED** journals. Transfers and write-offs can post stock GL events when Accounting is configured.

Setup Guide for New Organisations

1. **Locations** — create warehouses/stores; mark one Default.
2. **Tills** — at least one till per selling location.
3. **Units** and **Pack Sizes**.
4. **Categories** (hierarchy as needed).
5. **Suppliers**.
6. **Products** — add or bulk import; set cost, sell, min/reorder.
7. **Markup Rules** — Global default, then category/product overrides; Apply.
8. **Opening stock** — via Receive Stock or opening quantity on products.
9. Smoke test: receive → POS sale → transfer → stock take → Item Movements report.

Daily and Monthly Routines

Daily

1. Confirm till / location.
2. **Receive Stock** for deliveries.

3. Process **Transfers** (approve / receive).
4. Sell via Accounting POS / Pharmacy.
5. Check Dashboard low stock and reorder proposals.

Weekly / monthly

1. Run **Stock Take** for critical locations.
2. Clear **Price Approvals**.
3. Review NRV / dead stock on Dashboard; adjust or write down with finance.
4. Run **Item Movements** and **Purchases** reports for the period.

Troubleshooting

Situation	What to do
POS has no products	Select a Till linked to a location with stock
Cannot receive stock	Ensure supplier + location exist; use Receive Stock / fulfill order
Transfer stuck	Check status tab — approve, dispatch, or receive at destination
Sell price wrong after markup	Apply the rule; approve pending Price Approvals
Stock take variance unexpected	Confirm location scope; recount before Complete
Report empty	Widen date range; clear search; confirm movements exist
Dashboard shows dead stock	Review Top NRV table; Menu for item actions; align with finance write-down
